Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Comments	10/580,736	BONG, KIM KI				
Office Action Summary	Examiner	Art Unit				
	NOAH C. HAWK	3636				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because it contains legal phraseology such as the term "comprises". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/580,736

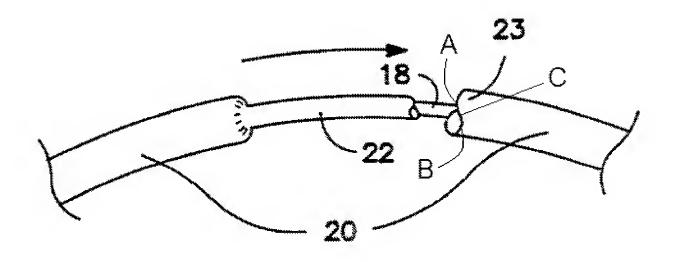

Art Unit: 3636

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Joo-Tai in US Patent 6286531 in view of Capshaw in US Patent 5435024. Joo-Tai teaches a collapsible tentpole (1) comprising: a series of hollow shafts (2) connected by insertion into each other (See Figure 2b); and an elastic cord (5) having two ends (6) arranged in the shafts with both said ends secured to the two endmost shafts (at 3' in Figure 1, for example). Joo-tai further teaches a sleeve tube (7) secured to the end of one shaft. Jootai fails to teach a groove on the end of the shaft. Capshaw appears to teach a collapsible tent pole having a series of hollow shafts (20) connected by insertion into each other (See Figure 3), wherein at least one groove (B) is arranged on at least one end of the shaft, that the groove is shaped into a smooth arcuate configuration (Best seen in Figure 3), that the end of the shaft and sleeve are of a wave configuration and the wave bottom (B) forms the groove. Capshaw teaches that a ring end of the shaft or the sleeve tube is diagonal (C), and a bottom of the diagonal ring end (B) together with the hollow interior of the shaft or the sleeve tube forms said at least one groove. Capshaw also teaches that the groove is a two-section groove with an upper section including two downwards extending arcs (A) and a lower section including two grooves (B) that extend downwards from the bottom of the upper section. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Joo-tai by adding at least one groove as taught by Capshaw to the sleeve tube in order to provide a more flexible insertion engagement for the tubes, insofar as the grooves

Page 3

Art Unit: 3636

would provide a user to press them together and create a frictional fit between the tubes.

Capshaw, Figure 3

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seo, Etheridge, Lin et al., Langlais and Lee teach collapsible tent poles.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NOAH C. HAWK whose telephone number is (571)272-1480. The examiner can normally be reached on M-F 9am to 5:30pm.
